**Terrance Babbie Attends the 13<sup>th</sup> Annual Westford Symposium on Building Science**

Milton, Delaware, Terrance Babbie, President of Colter Construction Inc. attended a three day seminar sponsored by Building Science Corporation on August 3<sup>rd</sup> in Westford, Massachusetts. The symposium featured demonstrations showing air tightness and/or causes of leakage in homes. It also featured video presentations with laboratory testing of different wall assemblies and their related performance under different climatic conditions.

As President of Colter Construction Inc. and builder/developer of the single family home community, Sandstone near Milton, Delaware, Terrance has taken a personal interest in not only building the most affordable and energy efficient homes in Delaware, but also in building homes that will save his client's 50% on their utility bills. Terrance has a vision to reduce the impact of construction on the environment and give his clients a home that will have long term value in a changing market. The goal of Colter Construction is to continuously improve their homes by incorporating the best methods, materials and knowledge of building science while providing unparalleled customer service.

This symposium featured several different presenters such as Sam Rashkin – National Director for the Energy Star Program and Doctors Andreas Holm and Hatwig Kuenzel who discussed whole building performance and indoor climate and energy concepts. Says Babbie “This was a fabulous opportunity to personally meet and have discussions with some of the brightest minds in the world on building science. I am excited to have had this opportunity and plan to incorporate these principles into our new homes”.

For Colter Construction, integrity is everything in the building business. His attention to detail in creating innovative home designs and using advance framing techniques has provided Colter with a sterling reputation unequaled in Delaware. Colter is currently building homes in the community of Sandstone, with their most recent home to be rated the most energy efficient home in Delaware barring solar and wind. Sandstone is located just off Rte 1 north of Milton, Delaware, and features a swimming pool, clubhouse, garden park, picnic pavilion, pools with fountains and much more. With larger sized homesites in a beautiful community setting, this is an innovative introduction to the future of new home communities.
